

Founded in 1997, Paragon Dynamics, Inc. (PDI) is a wholly owned subsidiary of KOR Electronics located in Cypress, CA. PDI is a small business that provides innovative systems, software, and analytical engineering services and solutions to the Intelligence Community and fortune 500 Aerospace clients.

**Paragon Dynamics, Inc. (PDI)** is a Small, Agile and Expert Company that provides best-in-class National Systems Development and Engineering Services through - Systems Engineering Technical Advise (SETA); Software Design & Development; Mission Engineering, Operations and Analysis; Systems Architecture & Engineering; Data Storage & Management, and System Engineering, Integration & Test Solutions for the Intelligence Community as well as fortune 500 aerospace companies.

**The reputation at PDI is based on Responsive and Focused engineering services resulting in superior products and solutions.**

## Qualities:

### Proactive

Turmoil cannot be prevented in today's 'high tech' environment. This requires '***Proactive Performance***'.

We assist organizations in preparing to take advantage of the economic, technological, and business opportunities that arise during these chaotic times.

### **Responsive**

We empower our engineering teams to quickly respond to your requests for support and provide the necessary resources to expertly achieve *Dynamic* results.

### Distinctive

Our 'Customer First Philosophy' enables us to refine our core expertise to meet the needs of our customers. We listen to their concerns and provide tailored, understandable technical solutions through '***Distinctive Agility***'!

### Innovative

Our guarantee of excellence in each of our business areas is the cornerstone upon which the company was founded. This level of excellence results from the '***Innovative Mindset***' and intellectual curiosity that drives the individuals and the corporation.

### **Accountable**

Our customer-focused engineers are veterans in government & aerospace operations with niche area expertise providing *Value Added* services to important space based missions.

---

---

The dedicated professionals at PDI consist of highly qualified engineers with direct experience in classified government and commercial satellite programs.

## **People**

People are the most critical ingredient to the Paragon Dynamics' formula for success. PDI attracts and retains some of the most highly qualified and sought-after engineering talent available. Every employee is a Subject Matter Expert (SME) who helps guide the success and future of the company. Our engineers have many years of diversified experience in designing, developing, and providing advanced technology solutions & analysis to our customers who have come to rely on our engineering expertise.

## **System Engineering Technical Advisors (SETA)**

Paragon Dynamics, Inc. has the advanced engineering expertise to ensure customer business objectives are met or enhanced through the proper implementation of knowledge management, mission operations, and analysis of SIGINT to the Intelligence Community. From infrastructure and satellite system concepts to functional requirements, through design and development, to installation and commissioning, PDI delivers the right engineering solutions that directly support Tactical and National business objectives of the Intelligence Community.

## **Software Design, Development and Test**

PDI applies a strong product-oriented approach to software development and has considerable breadth and depth of experience in Object Oriented Development (OOD) and Legacy System Migration. Equally important, and often overlooked, is our ability to comply with SEI Level 2/3 Practices for OOA/OOD employed at all levels of our software engineering efforts, from requirements definition to deployment and test. We accomplish this process through an incremental development process to mitigate risk and promote customer success.

## **Mission Engineering and Analysis**

PDI provides embedded, all-source Intel Analyst to support mission operations and long-term, multi-INT analysis requirements.

The Subject Matter Experts (SME) at PDI draw upon decades of experience in tactical and strategic SIGINT, MASINT, HUMINT, IMINT, and OSINT, tasking, collection, analysis, fusion, and reporting. We routinely apply critical thinking and analytic skills gained in intelligence operations, multi-INT analysis, multi-platform ISR and data fusion techniques to military operational support, and homeland defense and security.

We deliver mission critical solutions and information. PDI has created advanced methodologies for analyzing trends, applications, anomalies, and employment of communication technologies where none was evident or even possible before. These new methods seek to enhance user trends, and minimize weaknesses through the use of metadata, dramatically reducing the number of necessary internal analysts which is a huge benefit during times of reduced resources.

---

---

**Geographically Diverse:**

We are strategically located in major defense and mission operational hubs - Colorado, California, Georgia, Hawaii, Ohio, Texas, and the Washington, DC beltway area - to completely serve our customer segments.

**Our Style**

Provide Technology Based Engineering Services & Solutions Directed Towards the Safety and Security of Our Nation.

Combine All the Skills and Knowledge Necessary to Architect, Deliver and Integrate Better Space and Ground Satellite Solutions.

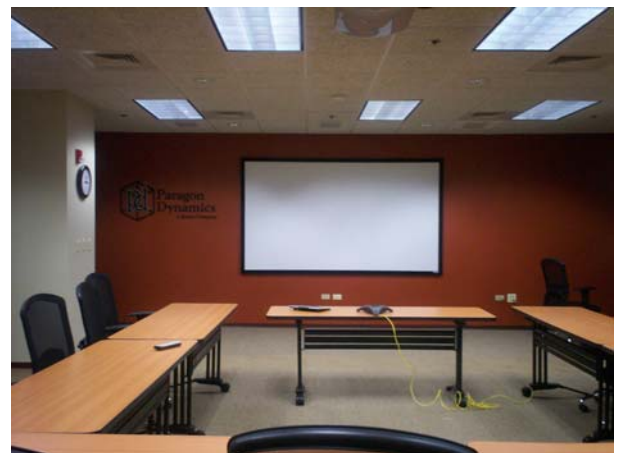

Integrity is An Inherent Part of Every Thing We Do. It's the Outcome, not the Output.

<b>Vision</b>	Be recognized for exceptional engineering expertise, mission operations & analysis and solutions development for All-source, Multi-INT environments within the National, Tactical and DOD market.
<b>Mission</b>	Apply effective technical & operational leadership enabling our customers to successfully exploit the full potential of information gathered through the direct application of space, air and ground system technologies. Provide our customers the enterprise systems and solutions they require to enable global mission execution.
<b>Values</b>	Paragon Dynamics, Inc. – subject matter experts (SME's) in engineering services, analysis, solutions development and systems architecture providing the best talent possible resulting in a customer centric relationship.

## PARAGON DYNAMICS 12,000 ft ENTERPRISE SOLUTIONS LAB

Paragon Dynamics, Inc  
3025 South Parker Road  
Tower II **Suite 1000**  
Aurora, Colorado 80014  
(303) 597-5200 phone  
(303) 636-1033 fax

The facility consists of: 1,000 square foot multi-media conference center and a 1,000 square foot climate/humidity controlled enterprise solutions lab (ESL) with 13 ton cooling capacity, 16KVA power backup system, and a FM200 Halon fire suppression system. The ESL has special access controls and will be connected to a high-data rate pipe. The facility is DCID 6/9, NSTISSAM Tempest 1-92, and STC 45 compliant with UL 2050 Certified Security Systems.
